

LAFCO

STOCK CONTROL

Rapid Stock Replenishment System

YOUR PROBLEM

« With Lafco's Stock Control app, I scan hundreds of items in a matter of minutes and receive my parts the next day. Simply said: it's just smart. »

1 Email your inventory database to your Lafco technician with desired internal code, location and re-order quantities.

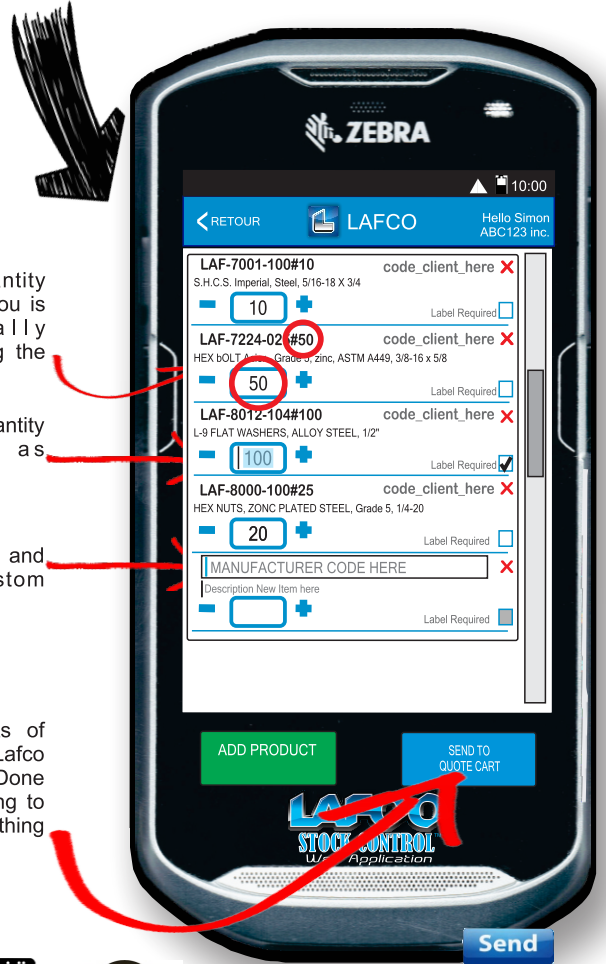

2 Lafco generates custom labels, sticker or magnetic, fit to your requirements.* Once on stock cabinets, they become the key to new found productivity.

**Des frais minimums peuvent s'appliquer*

3 Using Lafco's portable terminal, Client logs into his Stock Control account and can start scanning. Client can see total order value as he scans. Alter QTY's up/down or manually add new items. Check box if the customer wants to be sent (a new) label.

4 On a simple clic, Lafco receives client quote request. Our shipping department pick your items, respecting quantity entered. No pack minimums! All stock items usually ship on the same day!

OUR SOLUTION

A restock quantity determined by you is automatically registered during the scan.

Change the quantity up or down as needed.

Add new items and request a custom label

Send the results of your scans to Lafco with one click. Done the time of having to re-register everything in a file or email!

Save Time.
Save Money.
Gain Productivity.
